

Mohammed Sadiq Ali Morshid Aljomai

Biomedical Engineer

 Yemen, Sana'a  mohammed.sadiq.aljomai@gmail.com  +967: 782929873 / 739975023  linkedin.com/in/mosajo

PROFESSIONAL SUMMARY

A Biomedical Engineer with hands-on expertise in the maintenance, calibration, and installation of medical devices. Passionate about technical management and continuous improvement, committed to be an integral asset to any organization by driving operational excellence and reliability in healthcare environments.

EDUCATION

Bachelor's Degree in Biomedical Engineering

International Emirates University

Aug 2021 – May 2025

Diploma in Medical Equipment Maintenance

TESLATECH Center (in cooperation with Technomed Universal Company)

Oct 2025 – Dec 2025

Comprehensive Medical Marketing Diploma

TESLATECH Center (in cooperation with Technomed Universal Company & Tihama Company LTD.)

Jan 2026 – Feb 2026

Professional Experience

Biomedical Engineer

Al-Thawra Modern General Hospital

Jun 2026 – Present

- Gained hands-on experience in medical equipment maintenance and inspection.
- Supported the technical team in a hospital clinical environment.

Biomedical Engineering Intern

Tihama Tractors and Engineering Company LTD.

Jul 2025 – Sep 2025

- Installed and commissioned medical devices at client sites, including diagnostic equipment, ensuring full operational readiness and compliance with manufacturer specifications.
- Assisted in sourcing and inventory management of biomedical spare parts and electronic components, optimizing stock levels to reduce lead times for service contracts.
- Gained hands-on experience in understanding and operating medical devices and equipment.

Biomedical Engineering Intern

University Science and Technology Hospital

May 2024 – Jun 2024

- Conducted routine and corrective maintenance on specialized diagnostic equipment (e.g., biochemistry analyzers, imaging peripherals), applying manufacturer technical catalogs and service bulletins.
- Verified device accuracy and safety parameters post-repair, ensuring alignment with clinical acceptance criteria before returning equipment to service.
- Collaborated with clinical staff to identify recurring equipment issues and implemented preventive measures to extend device lifecycle.

Junior Biomedical Engineering Intern

Al-Gumhouri Teaching Hospital Authority

Jan 2024 – May 2024

- Operated, inspected, and performed preventive maintenance on patient monitors, infusion pumps, and electrosurgical units, ensuring compliance with electrical safety standards.
- Executed calibration and performance verification procedures on diagnostic devices under senior BMET supervision, reducing equipment downtime during clinical shifts.

- Diagnosed hardware and software faults using multimeters, oscilloscopes, and manufacturer service manuals; assisted in root-cause analysis and component-level repairs.
- Documented maintenance logs and incident reports to support accreditation and asset management compliance.

CERTIFICATIONS

Maintenance of Laboratory Equipment

Medical Edge Center for Training & Qualification Apr 2025 - May 2025

Maintenance of ICU Equipment

Medical Edge Center for Training & Qualification Jun 2025 - Jul 2025

Maintenance of Operation Equipment

Medical Edge Center for Training & Qualification Jul 2025 - Aug 2025

Maintenance of Diagnostic & Specialized Equipment

Medical Edge Center for Training & Qualification Aug 2025 – Oct 2025

ISO 13485:2016 – Medical Device Quality Management Systems

Alison Online Course Jun 2026 – Feb 2026

ISO 14971:2019 – Risk Management for Medical Devices

Alison Online Course Feb 2026 – Apr 2026

EU MDR 2017/745 – European Medical Device Regulation

Alison Online Course Apr 2026 – Jun 2026

Introduction to Biomedical Engineering

Alison Online Course Jun 2026 – Jul 2026

Fundamentals of Electronics

TESLATECH Center for Training & Qualification Oct 2025 – Dec 2025

SKILLS

Technical:

- Medical device operation & maintenance
- Device calibration & electrical safety
- Electronic circuit analysis & design (KiCad)
- Fault diagnosis & repair
- 3D spare part design (FreeCad)
- Medical device catalog adjustment

Regulatory & Quality:

- ISO 13485:2016
- ISO 14971:2019
- EU MDR 2017/745

Soft Skills:

- Teamwork and working under pressure
- Discipline & hard working
- leadership & responsibility
- Planning & problem-solving
- Fast learning & adaptability

Software:

- Microsoft Office Suite (proficient)
- KiCad (PCB designing App) & FreeCad (3D designing App)

Languages

- Arabic: Native speaker
- English: Great (5B Level)
